

CEBRA

Central Bank Research Association

Call: CEBRA's ASSA session – “The economics of digital currencies, distributed ledger technology, and DeFi”

CEBRA is organising a session at the **2022 Annual Meeting of the ASSA**, to be held on **January 7-9, 2022** in Boston, Massachusetts.

Papers are being sought on the topic of **“The economics of digital currencies, distributed ledger technology, and DeFi.”** This is a call for all papers broadly related to the theme of digital currencies, distributed ledger technology, and decentralised finance. We invite researchers to submit empirical and theoretical contributions to topics related, but not limited, to:

- The economics and mechanism design of permissionless cryptocurrencies & blockchain applications (security of proof-of-work/stake, transaction market design, applications, valuations etc.).
- The economics, mechanism design, and applications of permissioned distributed ledger technology
- design features of central bank digital currencies and global stablecoins
- The economics of decentralised finance
- The domestic and cross-border macroeconomic implications of digital currencies.

Committee: Raphael Auer (BIS) and Cyril Monnet (University of Bern)

Submit to assa@cebra.org

The submission deadline is April 30th.
